Professional Summary

Flutter Developer with 1.5+ years of experience developing and maintaining cross-platform mobile applications using Flutter and Dart. Hands-on experience with Riverpod state management, REST API integration using Dio, Firebase Firestore, responsive UI development, multi-step forms, form validation, and debugging. Experienced in contributing to applications across education, member management, and content-based domains.

Technical Skills

Programming Languages	: Dart, Python, C
Mobile development	: Flutter, responsive UI, reusable widgets
State Management	: StreamBuilder, Riverpod, GetX, Provider, Bloc(Basics)
API integration	: REST APIs, Dio, JSON
Database	: Firebase Firestore, SQLite, SQL
Tools	: Git, GitHub, Android Studio, VS Code

Experience

Flutter Mobile App Developer Skyraan Technologies - Coimbatore

May -2025 Present

- Develop and maintain cross-platform mobile applications using Flutter and Dart.
- Build responsive user interfaces and reusable widgets to deliver consistent user experiences.
- Integrate REST APIs using Dio and handle JSON responses with Dart models.
- Implement state management using Riverpod, GetX, Stream Builder to manage application data and UI updates.
- Integrate Firebase Firestore for real-time data handling and messaging features.
- Debug application issues, perform functional testing, and improve application stability.
- Maintain existing application modules, implement feature enhancements, and support application release activities.

Projects

Disease Dictionary – Flutter Mobile App

Disease Dictionary

Tech:Flutter, Dart, REST APIs, StreamBuilder, Text-to-Speech

- Independently developed the complete Disease Dictionary mobile application using Flutter and Dart.
- Built topic-based screens to display disease-related information, images, and videos.
- Integrated REST APIs and implemented dynamic UI updates using StreamBuilder.
- Implemented text-to-speech functionality and developed user-friendly interfaces for accessing disease information.

Church Management System (CMS) – Flutter Mobile App

Tech:Flutter, Dart, Riverpod, Dio, REST APIs

- Developed mobile UI modules for church administration and member-facing workflows.
- Implemented state management using Riverpod for reactive UI updates and application state handling.
- Integrated REST APIs using Dio for member directory searches, event updates, and attendance submissions.
- Worked on reusable UI components, search and filtering interfaces, and local data caching.

Teachraan School ERP – Flutter Mobile App

Tech:Flutter, Dart, Riverpod, Firebase Firestore, Dio

- Independently developed a cross-platform school management mobile application using Flutter and Dart.
- Implemented application architecture and state management using Riverpod.
- Integrated REST APIs using Dio for data retrieval and application functionality.
- Developed real-time classroom chat functionality using Firebase Firestore, including message handling and unread message counts.
- Built and maintained school management features with a focus on responsive UI, application stability, and user experience.
- Tested functionality, resolved bugs, and improved application reliability.

Bible Lite – Flutter Mobile App

Bible Lite

Tech:Flutter, Dart, Getx,SQFLite

- Developed the Bible reading-plan module, implementing its core functionality and user interface.
- Designed and developed a vertical video player with play/pause controls.
- Fixed bugs across multiple existing application modules to improve functionality and stability.
- Supported application maintenance and contributed to preparing and releasing an updated app version.

Education

Jai Shriram Engineering College, Tirupur — 2021-2025

B.Tech, Artificial Intelligence and Data Science — CGPA:8.37
