Professional Summary

Motivated Flutter Developer who enjoys building clean, responsive mobile apps with solid architecture and smooth user experiences. Comfortable working with REST APIs, managing data, using local storage, and improving UI performance to create reliable and user-friendly applications.

Technical Skills

Programming Languages : Dart, Python, C
UI / State Management: : StreamBuilder, Riverpod, GetX, Provider, Bloc (Basics)
Databases / Storage : SQLite, Firebase Firestore (Basic), SQL
Developer Tools / IDEs: : Android Studio, VS Code, Git
Machine Learning Libraries: : NumPy, Pandas, Scikit-learn, OpenCV, Algorithms
Analytical Tools: : Excel, Power BI

Internship

- **Flutter Mobile App Developer Intern** — May -2025 Present
  Skyraan Technologies - Coimbatore
  - Developing **cross-platform mobile applications** using Flutter.
  - Completed one full project involving **UI design**, **API integration**, and **state management**.
  - Currently contributing to an active production project with feature implementation and UI improvements.
  - Integrated **REST APIs,** handled **JSON data**, and **implemented authentication flows**.
  - Performed **testing, bug fixing**, and **performance optimization** to improve app stability.

- **Machine Learning Intern** — July -2023
  TechVolt Software Pvt Ltd - Coimbatore
  - Developed a hybrid predictive model for **Remaining Useful Life** (RUL) of **Electric Vehicles** (EVs) using **XGBoost** and **Random Forest.**
  - Collected, pre-processed, and analysed time-series sensor data for predictive modeling.
  - Evaluated model **performance, optimized parameters,** and implemented feature engineering to improve accuracy.
  - Gained hands-on experience with Python libraries for **machine learning, data analysis, and visualization.**

Projects

- **Disease Dictionary – Flutter Mobile App** — **Disease Dictionary**
  Tech: Flutter(Dart), StreamBuilder, REST API
  Platform: Android (Live on Play Store) & iOS
  - Developed a medical reference app with disease info, images, and videos.
  - Built responsive, topic-based screens with text-to-speech and dynamic updates via StreamBuilder.
  - Integrated REST APIs, optimized performance, and published on Google Play Store.

- **Agricultural Machinery Encyclopedia – Flutter (In Development / Internal Testing)**
  Tech: Flutter(Dart), Riverpod, REST API,
  Platform: Android & iOS
  - Developing an educational app with interactive learning, structured content, and Reels-style video scrolling.
  - Implementing Riverpod for scalable state management, responsive UI, and smooth navigation.
  - Integrated REST APIs for real-time content and ensured production-ready quality through testing and debugging.

Education

Jai Shriram Engineering College, Tirupur — 2021-2025
B.Tech, Artificial Intelligence and Data Science — CGPA:8.37
